# Previous feedback 6 dec

along with New Feedback below

- ○ after clicking on sell product where all price breakup is shown and the text is shown, add title on that popup screen **Price Break-up**.

- ○ Login through fb page shows something uber jockey will receive information???

- ○ complete Address should not be shown anywhere in the app (like home page, individual product page), it should just show City/State. complete Address is only for shipping purpose

- ○ Username should not be in capital letters.

- ○ username/ profiles are not clickable on the home screen, it is only clickable in the individual product screen that too only user name is clickable, complete pic and username should also be clickable and redirect to user profile, like people can check/view each others profile.

- ○ Sharing option not working on home screen.
- ○ sometimes clicking on home still redirects to shop page.
- ○ Home page - product title should be shown below the image
- ○ Camera button to share pics in chat functionality not working.
- ○ Back option not coming on purchases, sales,order,T&C, contact us,FAQ, how to sell, chat.
- ○ left side menu showing messed up profile name and pic sometimes. should be clickable and redirected to my profile.

- ○ pop-up screen doesn't closes by clicking ok.

like:

Profile update ok	Filter ok
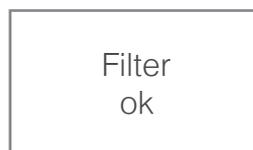

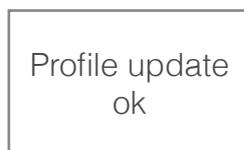

Filter: Only by category is shown

should also include filter by:
- ● Price range
- ● Distance / near by
- ● Brands

- ○ Gallery view not working

- ○ Notifications for chat, order, sales.

o Enter display price text should not be shown in selling form as alert because that value is automatically calculated and we cant enter it.

o Price values in selling form lil size and font should be changed so that it seeks attention.

o after clicking sell product, all the text font should be changed. some good font.

o if a value is not added in selling form it displays in red alert colour , but when we are at bottom form near sell product button, we cannot see if anything or any value has been missed above. we keep on clicking sell product. so if a value is not added and we click on sell product, so it should take to the screen to that values which has not been entered, as it creates confusion and we will keep on clicking sell product button.

o price break-up text should be shift on top

o After clicking a picture there is no option to crop, rotate, adjust brightness

o Where there is
   Note: listed price includes stylify commission and taxes………. (in selling form)
Change text LISTED PRICE TEXT TO DISPLAY PRICE.

IN INDIVIDUAL PRODUCT PAGES

○ in individual product page if there is more than one image for a product then slider buttons will be shown/ visible.

○ thumbs up & thumbs down symbol for what..??

○ when user clicks on product image it should get enlarged.

○ User name, product name, old/new condition, price should be little attractive by giving a good bold type font, not too large, font style should be good and attractive

○ sometimes Condition not displaying properly.

○ Description (this text should be shown) then after it product description should be shown below.

○ item location - should be city/ state only. not complete address.

○ remove time/date of product added

○ Brand:(predefined) I Size: [these should be shown in one line]

IN MY PROFILE

- ○ joined
  verified - only those who complete their Kyc documents
  stylify.com/bagcoholic- ?????

- ○ editing of products which have been uploaded can't be done. [very imp]

- ○ show only Username, display pic, City/state, tell us about urself, no. of products in closet.

- ○ not able to add pic through gallery. it says capture , browse after clicking browse nothing happens (technical glitch i guess)

Not Able to sell is profile is incomplete

EDIT MY PROFILE

- tell us about yourself. (lil text box like structure)
  [This text will be shown in my profile under username]

- In edit personal info first name
- state X
- city X
[remove these options as they are given in personal info]

- Edit Bank details (KYC details)

as payments will be transferred to them directly with the help of split payment payment gateway api. While deducting our commission and shipping charges to the admin and their asking price to them.

- Edit Address (by clicking this option the following will appear)

- address title*
- address line*
- landmark*
- Country- (india only)
- State* - Predefined (imp)
- City* - Predefined (imp)
- pincode*

when the address is added and saved then sellers do not have to add address again and again in the seller form if they are logged in from their profile. address and ph number will be picked from their profile. (imp)

o Saving option sometimes not responding while saving a profile or editing it.

o When we click on others profile their ph. no. and their id is visible which is not good for security reasons. so if we click on someones profile only their profile should appear with their tell us about urself and their no. of products added.

_____

○   My purchases :
     my purchases text will be shown on top and in centre and in good font.
     New purchases should come on on top and old purchases should go down

○   My sales :
     my sales text will be shown on top and in centre and in good font.
     New sales should come on top and old sales should go down.

○   My orders :
     My orders will show new orders received or pending orders which a seller has received, with all the buyer information along their individual orders, as invoice and shipping details .

     (as our company will be providing shipping services, so sellers need to print the invoice, and shipping label and paste it on their package)

○   notifications for chat feature not done.

● ITEMS WHICH SELL, SHOULD SHOW SOLD IN FRONT OF THEM. A PATCH SHOULD COME ON CORNER OF THE PIC.

● WORK ON APPEARANCE ALSO U/I , FONTS AND LAYOUT REFINE.

● WISHLIST/FAVOURITE ICON ON TOP IS NOT PROPERLY CENTERED ALIGNED WITHIN THE CIRCLE

● SOMETIMES WE BACK IN THE APP ITS STILL REDIRECTING TO SHOP PAGE, IT SHOULD REDIRECT TO HOME PAGE.

● LOGO NEEDS TO BE CHANGED

Backend admin panel:

- Dashboard: Users, products, Orders, Earnings(commission ,shipping,), total Sales.
- How to add and edit dynamic content
- Category is there but Sub-category cant be seen.
- brands cant be seen
- Product
- show images in small along with name, conditions etc…
- instead of total price
- Asking price
- Display price
- Orders- admin can see total orders received as a list view, but in orders we need more detailed information along individual orders.

Already there	To be added options like:
- Order id	Seller address complete
- product name	Seller mail id
- price	Seller ph no.
- buyer	Buyer address
- seller	Buyers mail id
- date	Buyers no.
	Payment method
	Order invoice (proper)
	Shipping label (proper)

*WILL SEND PREDEFINED CATEGORIES
ITS SUB CATEGORIES
PREDEFINED BRANDS

New Feedback for updated APK-14december

- the size of the image should be the same which is being shown in the home screen.
- user name not in capital in my profile only initial should be in capital

- city,state,country which you are showing in other people's my profile **hide it its not necessary.**
- where its written **4weeks ago**| kakindia, on home page , this text should be aligned below the user name and a bit small, it should not be below the user image. and only time should be shown like 4 weeks not city,state on home screen. the color of this text is not good should be good light grey. and small.

- product title also should not be in capital.

- if we click on others profile, why r we getting the option to change their profile image.

- *I like the way you have shown products in my sales and my purchases. (the shadow kind of effect). use the same in chat functionality also, and where ever it can be done. its good.*

- give delete options to clear products from my sales, my purchases, in chat also.

- Price Break-up text should also not be in capital letters, only initial in capital.And this text should be in good font, bold and good font. And it should have the same orange color horizontal line below it then rest of the text is displayed.Also change the font style of the rest of he text.

- the text in price break-up screen is not complete.Are you sure you want to post this product?

- item condition problem still persists, sometimes conditions is not displaying sometimes it is displaying.

These are the feedback which i can come up with and rest I'm waiting for the previous Feedback to be completed fully as mentioned in the earlier feedback document.

ThankYou
